

GRANUMIN MINI

The GRANUMIN MINI

For easy, clean and very precise coloring of your product. Granumin mini is intended for small quantity dosing with high accuracy. Main feature is that you can easily create your own shades by accumulative weighing of 4 basic colors. Special colors are also possible to use (e.g. carbon, white or green). The unit is directly supplied with small bags in 4 feeding reservoirs (specially 6 reservoirs) with capacity for 75 Kg of compact or granulated pigment. The dosing is made with butterfly valves in a range from 100g to 15 Kg with accuracy of +/- 10g. Contents of weighing container is simply emptied into the skip, directly in mixer or onto the aggregate belt. Mounting and integrating of dosing equipment is possibly done by the customer or by Pinky-s with possibility of PLC or PC control automation tailor-made specially for your requirements and needs.

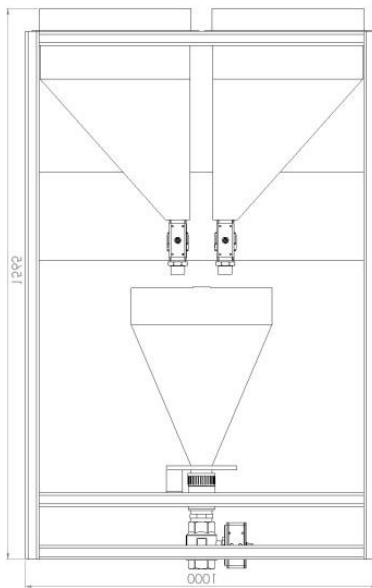

- Accumulative weighing
- Colormix production
- For 1 to 4 colors (specially 6)
- Feed reservoirs capacity of 75 Kg
- Dosing range 100g – 15 Kg
- Accuracy +/- 10 g
- With coarse and pulse dosing
- Large number of recipes

System specification	
Dosing range:	0,1 – 15 Kg
System accuracy:	+/- 10 g
